Please check with your local extension service to ensure registration status. All products are EPA registered A290-052709-8 4/18

Unmatched Nematode Control. Unique Yield Enhancement.

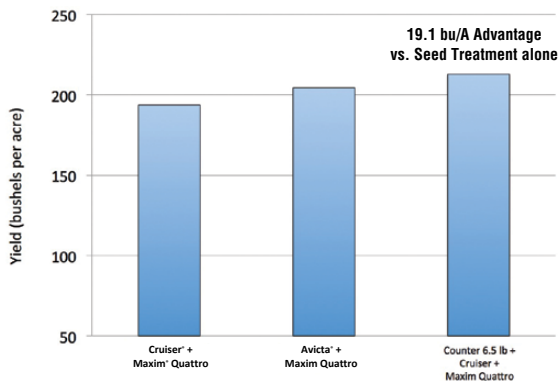

On-farm trials and university tests show COUNTER® 20G consistently helps increase yield response in below-ground trait hybrids. **COUNTER 20G is the one and only granular insecticide**

that gives you targeted control of nematodes, plus rootworms and other seed-attacking pests. When nematodes are the problem, COUNTER 20G is the solution.

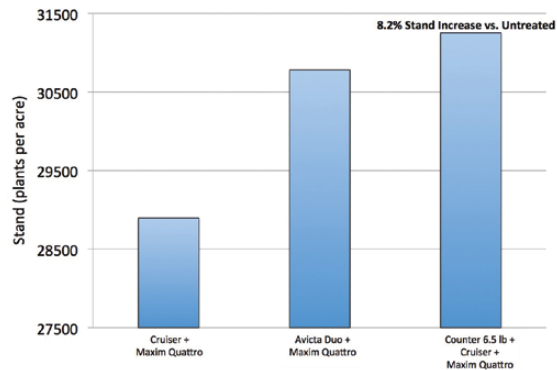

- Nematodes infest all soil types and textures — any cornfield is vulnerable.
- Continuous corn, less tillage and reduced soil insecticide usage have contributed to increases in nematode numbers — and populations continue to grow throughout the season.
- Nematodes can easily reduce corn yields by 30 percent or more.
- Nematode feeding cuts yields, and causes injuries that can lead to disease and secondary rots.

Yield Advantage with Counter 20G at Planting for Nematodes
Southern Illinois University Trial – Carmi, IL 2013

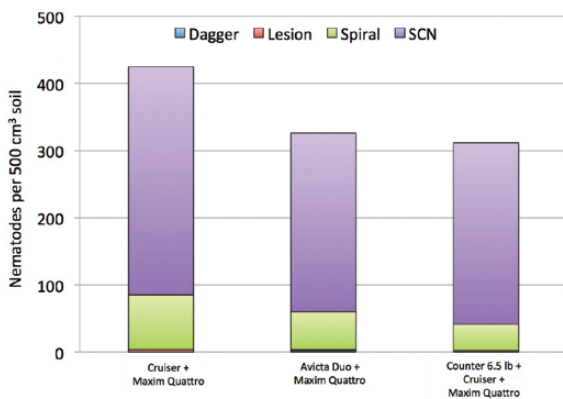

Trial conducted by Dr. Jason Bond, Southern Illinois University, Carbondale, IL. Counter 20G applied with a SmartBox® application system.

Stand Advantage with Counter 20G at Planting for Nematodes
Southern Illinois University Trial – Carmi, IL 2013

Trial conducted by Dr. Jason Bond, Southern Illinois University, Carbondale, IL. Counter 20G applied with a SmartBox® application system.

Nematode Population Densities 6 Weeks after Planting
Southern Illinois University Trial – Carmi, IL 2013

Trial conducted by Dr. Jason Bond, Southern Illinois University, Carbondale, IL. Counter 20G applied with a SmartBox® application system.

Maximize Yield Potential and Protect Profits with the proven power of COUNTER® 20G Nematicide/Insecticide.
